Vernon Talbot, Managing Director  
RetroPlate – Advanced Floor Products, Inc.  
P.O. Box 80533  
Provo, UT 84606

Dear Vernon,

Great news! RetroPlate™ (Advanced Floor Products, Inc.) has been selected as one of BuildingGreen's Top-10 Products for 2006. This product was chosen for an award from among the products newly listed over the last year in BuildingGreen's product directory, *GreenSpec*® or covered in *Environmental Building News*.

BuildingGreen, Inc. is an independent company with a long-standing reputation for publishing accurate, unbiased and timely information for building professionals who are interested in improving the environmental performance of buildings and surrounding landscapes.

*GreenSpec*, the most comprehensive national directory of green building products, includes more than 2,100 product listings. The directory does not carry advertising, and manufacturers do not pay for listings; product selection is based on careful evaluation of products based on green criteria developed by the editors of *Environmental Building News* over the past eight years. (See "What Makes A Product Green.")

More than 250 new listings were added to the directory over the last year, and out of those our staff selected ten products for this special recognition. Our intent with this annual award is to draw national attention to some of the most exciting and innovative new products in the green building field.

You are welcome to promote the recognition of your product as a Top-10 winner in press releases and other marketing. Please see the press release template and Top-10 Product logos included in this packet.

Congratulations on this award. I look forward to seeing future product developments from your company.

Sincerely,

Alex Wilson, Co-editor, GreenSpec, President, BuildingGreen, Inc.
